Basis of calculation and assumption made in calculating the returns:-

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return	= NAV per Unit end / NAV per Unit begin – 1
Income return	= Income distribution per Unit / NAV per Unit ex-date
Total return	= (1+Capital return) x (1+Income return) – 1

¹The TER of the Fund was higher than previous period due to higher expenses incurred for the Fund during the financial period.

²The increased in the Fund's PTR was due to higer trading activities for the financial period.

Asset Allocation

For a snapshot of the Fund's asset mix during the period under review, please refer to Fund Performance Data.

As at 28 February 2023, the Fund was 86.23% invested with 83.30% in Shariah-compliant equities, 2.93% in Shariah-compliant collective investment scheme (CIS), and the remaining was held in cash and cash equivalent. During the period under review, the Manager had added exposures into consumer products & services, energy, plantation, Real Estate Investment Trust (REITs), telecommunication & media and utilities sector while decreased exposure mainly in the construction, financial services, healthcare, industrial products & services, property, technology and transportation & logistics sector. Cash level of the Fund was increased to 13.77% over the same period.

Strategies Employed

The Fund raised cash levels at the start of the year amidst prevailing market volatility. The Fund had notably added exposure to REITs for defensives measure and continued to take profit in cyclicals sectors with limited upside. The Manager has also raised positions in beneficiaries of China reopening and reduced exposure in holdings that are at risk of ex-China slowdown and those at high valuations.

Market Review

2022 was a challenging year with market headwinds including inflation, geopolitical risks, slowing economic growth, and an uncertain earnings picture. Inflation was one of the key concerns given the hawkish stance adopted by central banks in an attempt to quell the ever-present inflation concerns. During last year, the Federal Reserve (Fed) embarked on a series of rapid and synchronised tightening to tamp down on inflation, raising the fed funds rate to 4.50% in December 2022. The Fed raised rates by 25bps to 4.75% at the beginning of February. Later in the month, Jay Powell cautioned that he expected a long process of disinflation and necessity of further rate hikes, if the economic data does not cooperate. January US headline and core CPI rose at a year-on-year rate of 6.4% and 5.6% respectively, slightly higher than expectations. The unemployment rate declined to a multi-decade low of 3.4% while US retail sales climbed to a two-year high. The ECB raised interest rates by a further 50bps in February. Eurozone headline inflation fell to 8.5% while core inflation increased to 5.3%.

The macro volatility and uncertainties were the main drivers behind the decline in developed market equities last year. The MSCI World index fell 6.8% YoY, European equity market were up 5.3%; while US equities decreased by 7.7%, which was among the worst performing regions in 2022, with Fed comments throughout the year inferring that they would move with more haste to quell the ever-present inflation concerns.

In 2022, the Asia ex Japan equity returns were supported by China's reopening as authorities shifts away from its strict zero COVID policy in an abrupt announcement last December, Beijing announced that it will be unwinding all its COVID restrictions as well as lift its border closures to allow for international travel. However, the broader MSCI Asia ex Japan index fell 14.1% YoY as tensions between US and China were rekindled. The relative lull between US and China was pierced through after US military firefighter jets shot down a suspected spy balloon owned by China. During the month of February, we saw an exchange of rancour as US sanctioned various China-based firms that were allegedly connected to the spy balloon. Similarly, China imposed sanctions on two defence companies for allegedly selling weapons and military technology to Taiwan.

On the domestic front, the benchmark KLCI fell 5.8% YoY, and edged 2.11% lower in February as market reaction to Budget 2023 was neutral. In his budget speech, Prime Minister cum Finance Minister Datuk Seri Anwar Ibrahim emphasised fiscal discipline and vowed to bring down the country's fiscal deficit to 5.00% of GDP. This will be supported by new tax measures to bolster revenue collections including the introduction of a luxury goods tax, excise duties on liquid/gel products containing nicotine as well as higher dividends from national major Petronas of RM 40 billion.

Global bond markets performed negatively in 2022, arising from central banks boosting interest rates to control the inflation. The "higher-for-longer" chorus on interest rates harmonised with the hard landing recessionary fears, which led to an inversion of the yield curve on 1st April between the 2-Year and 10-Year Treasury, closing the year on 4.4% and 3.5%, respectively. The US investment grade credit spreads tightened 26 bps in the last quarter of 2022, ending the quarter at 121 bps. Credit spreads tightened during the quarter amid modestly better growth expectations and declining inflation. In the month of February, the government bond yields were broadly higher. US 10-year yields rose from 3.53% to 3.91%, with the two-year yield increasing from 4.21% to 4.80%. Both US and European high yield showed negative performance. US and European investment grade performed mildly positively. Emerging market debt performed negatively both in local currency terms and in USD terms.

Asian credits retreated 1.33% in February, with losses entirely driven by higher UST yields as credit spreads tightened about 8 bps. Asian high-grade (HG) credit returned -1.29%, while Asian high-yield (HY) credit retreated 1.55%.

On local fixed income, the 10-year MGS yield rose 12 bps to close at 3.92% in February. With a commitment to remain fiscally disciplined as well as lower expected government bond issuances, the bond market could take positive cues from Budget 2023.

Investment Outlook

Despite strong returns over recent months, global equity markets remain susceptible to shifting sentiment towards geopolitical tensions, inflation, economic growth and ultimately corporate earnings. Valuations have already significantly adjusted to reflect a change in the market environment, and we believe reflect realistic expectations for inflation, rates and risk premia. Consequently, the source of risk has now shifted from valuation to earnings in light of the softer growth and prospects for a recession, which appears increasingly likely.

Within Asia, we continue to believe that China is expected to be a strong source of growth and returns for Asia. The Chinese equities as well as credit market took a breather in February after strong rally in the past months. Market sentiment was dampened by the re-intensifying geopolitical tensions between US-China which arose from the balloon controversies and the plan to expand US troops in Taiwan for military training. On the other hand, macro and economic front continued to deliver encouraging data. Consumption continued to recover in February, stronger and at a faster pace than expected. Signs of the rebound were evident over the Chinese New Year holiday, and domestic tourism recorded the strongest visitor and revenue levels since the pandemic. Manufacturing activity also picked up. China's official manufacturing PMI rose to 52.6 in February from 50.1 in January. Non-manufacturing PMI also jumped 12.8pt to 54.4, the highest reading in seven months. The supportive stance continued into 2023 and was recently validated by the 2 sessions that took place in early March. The general positive tone on economic recovery and consumption stimulus remains, alongside with the announcement of the new cabinet and securing of President Xi's third term.

In contrast to the expected slowdown in the developed market economy, Malaysia's economic fundamentals continues to remain strong. The government unveiled its revised budget, focusing on sustainable economic growth, institutional reforms and reducing social inequality. The benchmark KLCI edged 2.11% lower as market reaction to Budget 2023 was neutral. Our view is that newly tabled budget is a pragmatic one that should restore confidence and shore up support in the long run. The absence of any prosperity tax is a huge relief to the market that should augur well for corporate earnings.

Bond investors may see some relief this year after enduring a painful 2022 which saw rates volatility reaching unprecedented highs. In 2023, volatility in rates is expected to temper down as we see a slower pace of adjustment in rates. In addition, a slower growth outlook is beneficial for rates. On local fixed income, credit rating agencies are likely to maintain the sovereign ratings of Malaysia bonds. We expect range bound yields in 1Q23. Local demand for bonds is still healthy and is expected to be anchored by real money investors. Rates volatility will be driven by external development.

China property developers went through an unprecedented phase which caused a widespread default in the USD Asia Credit market. In 2022, USD 67.3bn of defaults emerged from the China high-yield (HY) property sector, which translated to a default rate of close to 66%, or 52% of China HY. The defaults started emerging after a series of tightening policies that were rolled out by the Chinese government in their attempt to rein in financial risks after being the first to emerge out of Covid-19. Some of the tightening measures that the Chinese government used include tighter funding channels, tighter escrow account monitoring, and slower mortgage approvals by the local governments. The Covid-19 lockdowns implemented for the most part of 2022 also dampened property sales in China sharply.

The property sector is an important sector for the Chinese economy given that it accounted for 25% to 30% of China's GDP. While the Chinese Government has cut interest rates and made various announcements that it will support the property sector, it was only in 4Q22 that the Chinese government started rolling out more constructive measures. They introduced the Three Arrows (loans, onshore bonds and equity) and 16-point plan to support for the property market. Several developers were able to issue onshore bonds with credit enhancements like guarantees from China State-owned entities or credit risk management tools.

6.	RISK FACTORS	
6.1	GENERAL RISKS Performance risk There is no guarantee in relation to the investment returns or on the distribution of income to Unit Holders.	<u>The performance of the Fund depends on the financial instruments that the Fund purchases. If the instruments do not perform within expectation or if there is a default, then, the performance of the Fund will be impacted negatively. The performance of the Fund may also be impacted if the allocation of assets is not properly done. This is where the experience and expertise of the fund managers are important and the risk on the lack of experience and expertise of the fund managers has been highlighted above. On that basis, there is never a guarantee that investing in the Fund will produce the desired investment returns or distribution of income.</u>
6.2	GENERAL RISKS Liquidity risk Liquidity risk arises in two scenarios. The first is where the Fund’s investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the Fund’s investment, by its nature, is thinly traded. This will have the effect of causing the Fund’s investment to be sold below its fair value which would adversely affect the NAV of the Fund.	Liquidity risk arises in two scenarios. 6.3	<p>GENERAL RISKS</p> <p>Credit and Default risk</p> <p>Credit risk relates to the creditworthiness of the issuers of the investment (Islamic money market instruments) and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.</p>	<p>Credit and default risk</p> <p>Credit risk relates to the creditworthiness of the issuers of the investment (Islamic money market instruments <u>and the Financial Institutions where the Islamic deposits are placed</u>) and their expected ability to make timely payment of <u>profit</u> and/or principal. Any adverse situations faced by the issuer <u>and/or Financial Institution</u> may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer <u>and/or Financial Institution</u> of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.</p>
6.4	<p>GENERAL RISKS</p> <p>Interest rate risk</p> <p>The level of interest rates has an impact on the value of investments and economic growth of a country. High interest rates dampen investments and aggregate demand leading to an economic slowdown. The value of Islamic money market instruments move in the opposite direction of interest rates, any increase in rates will lead to a reduction in the value of Islamic money market instruments, thus affecting the NAV of the Fund.</p> <p>The interest rate is a general economic indicator that will have an impact to the management of the Fund, regardless of whether it is a Shariah-compliant fund or otherwise. It does not in any way suggest that the Fund will invest in conventional financial instruments.</p>	<p><u>Profit rate risk</u></p> <p><u>Islamic money market instruments are subject to profit rate fluctuations. Generally, movement in profit rates affects the prices of Islamic money market instruments inversely. For example, when profit rates rise, prices of Islamic money market instruments will fall. The fluctuations of the prices Islamic money market instruments will also have an impact on the NAV of the Fund. This risk can largely be eliminated by holding Islamic money market instruments until their maturity. We also manage profit rate risk by considering each Islamic money market instruments' sensitivity to profit rate changes. When profit rates are expected to increase, the Fund would then likely seek to switch to Islamic money market instruments that are less sensitive to profit rate changes. For investments into Islamic deposits, the fluctuations in the profit rates will not affect the placement of Islamic deposits but will result in the opportunity loss by the Fund if the placement of Islamic deposits is made at lower profit rate.</u></p>
6.5	Nil.	<p>Inserted the following:</p> <p><u>Suspension of repurchase request risk</u></p> <p><u>Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.</u></p>

6.6	<p>SPECIFIC RISKS</p> <p>Equity investment risk</p> <p>This is the risk associated with investing in a particular equity. The value of individual equity is mainly determined by its potential growth in earnings, sound management, and treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve these would result in declining investment value which in turn affects the performance of the Fund. This can be mitigated by diversifying the Fund’s portfolios.</p>	<p><u>Shariah-compliant stock specific risk</u></p> <p><u>Prices of a particular Shariah-compliant stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such Shariah-compliant stock held by the Fund will adversely affect the Fund’s NAV.</u></p>
6.7	<p>RISK MANAGEMENT</p> <p>In our day-to-day running of the business, we employ a proactive risk management approach to manage portfolio risks and operational risks. The Board of Directors of AHAM (“the Board”) has established a board compliance & risk management committee to oversee AHAM’s risk management activities both at operational level and at portfolio management level to ensure that the risk management process is in place and functioning. The board compliance & risk management committee comprises of at least three Board members and is chaired by an independent director. At the operational level, we have established a compliance & risk oversight committee with the primary function of identifying, evaluating and monitoring risks as well as to formulate internal control measures to manage and mitigate the exposure to risks that may affect the performance of the Fund, returns to the investors or Unit Holders’ interest within a clearly defined framework and is primarily responsible for ensuring that the policies and procedures that have been implemented are reviewed on an on-going basis with periodic assessments. The compliance & risk oversight committee reports to the board compliance & risk management committee on a quarterly basis.</p> <p>In managing portfolio risks, we engage a stringent screening process by conducting fundamental analysis of economic, political and social factors to evaluate their likely effects on the performance of the markets and sectors. Regular meetings are held to discuss investment themes and portfolio decisions taken at the meetings are then implemented according to the investment guidelines which also take into account requirements for minimum portfolio diversification across individual investment holdings, sectors, geographies and asset classes (based on the respective portfolio’s objective and strategy). If the contributions from non-permissible activities exceed the benchmark, the company will be classified as Shariah non-compliant. The benchmarks are as follows:</p> <p>(a) The 5-percent benchmark The 5-per cent benchmark is applicable to the following businesses/activities:</p> <ul style="list-style-type: none"> • conventional banking; • conventional insurance; • gambling; • liquor and liquor-related activities; • pork and pork-related activities; • non-halal food and beverages; • Shariah non-compliant entertainment; • tobacco and tobacco-related activities; • interest income from conventional accounts and instruments (including interest income awarded arising from a court judgement or arbitrator and dividends from Shariah non-compliant investments); and • other activities deemed non-compliant according to Shariah. <p>For the above-mentioned businesses/activities, the contribution of Shariah non-compliant businesses/activities to the company's revenue or company's profit before taxation of the company must be less than 5 per cent.</p> <p>(b) The 20-percent benchmark The 20-per cent benchmark is applicable to the following</p>	<p><u>that are prohibited by Shariah principles based on the parameters of the applicable Shariah Advisory Council and the Shariah Adviser.</u></p> <p><u>Investment in Malaysia</u></p> <p>(a) Equity <u>The Fund will invest based on a list of Shariah-compliant equities (inclusive of Shariah compliant warrants) by the SAC of the SC.</u></p> <p><u>For initial public offering (IPO) companies that have yet to be determined the Shariah status by the SAC of the SC, the Shariah Adviser adopts the following analysis as a temporary measure in determining its Shariah status until the SAC of the SC releases the Shariah status of the respective companies.</u></p> <p>(1) <u>Qualitative analysis</u></p> <p><u>In this analysis, the Shariah Adviser will look into aspects of general public perception of the companies' images, core businesses which are considered important and <i>maslahah</i> (beneficial) to the Muslim <i>ummah</i> (nation) and the country. 10.3 COMPUTATION OF SELLING PRICE AND REPURCHASE PRICE

The Selling Price and the Repurchase Price are equivalent to the NAV per Unit. Any applicable Sales Charge and Repurchase Charge are payable separately from the Selling Price and Repurchase Price.

Under a single regime, the Selling Price and the Repurchase Price are equivalent to the NAV per Unit. Any applicable Sales Charge and Repurchase Charge are payable separately from the Selling Price and Repurchase Price.

Forward Pricing will be used to determine the Selling Price per Unit and the Repurchase Price per Unit of the Fund, which are the NAV per Unit for the Fund as at the next valuation point after we receive the purchase request or repurchase request.

Forward Pricing will be used to determine the Selling Price per Unit and the Repurchase Price per Unit of the Fund, which are the NAV per Unit for the Fund as at the next valuation point after we receive the purchase request or repurchase request.

The Selling Price for Units of the Fund created under the EMIS will be based on the NAV per Unit at the end of the Business Day on which the purchase request or repurchase request is received by us.

The Selling Price for Units of the Fund created under the EMIS will be based on the NAV per Unit at the end of the Business Day on which the purchase request or repurchase request is received by us.

Calculation of Selling Price

Units will be sold at the NAV per Unit of the Fund. Any Sales Charge payable by the Unit Holder would be calculated as a percentage of the NAV per Unit of the Fund.

Calculation of Selling Price

For illustration purposes, let's assume the following:

For illustration purposes, let's assume the following:

Investment Amount	MYR 10,000.00
Selling Price per Unit	MYR 0.50
Number Of Units Received*	MYR 10,000 ÷ MYR 0.50 = 20,000 Units
Sales Charge	5.50%
Sales Charge Paid By Investor**	5.50% x MYR 0.50 x 20,000 Units = MYR 550
GST of 6%***	MYR 550 x 6% = MYR 33
Total Amount Paid By Investor****	MYR 10,000 + MYR 550 + MYR 33 = MYR 10,583

Investment Amount	MYR 10,000.00
Selling Price per Unit	MYR 0.50
Number Of Units Received*	MYR 10,000 ÷ MYR 0.50 = 20,000 Units
Sales Charge	5.50%
Sales Charge Paid By Investor**	5.50% x MYR 0.50 x 20,000 Units = MYR 550
Total Amount Paid By Investor***	MYR 10,000 + MYR 550 = MYR 10,550

Formula for calculating:-

* Number of Units received = $\frac{\text{Investment Amount}}{\text{Selling Price per Unit}}$

** Sales Charge paid by Investor = Sales Charge x Selling Price per Unit x Number of Units received

*** Total amount paid by Investor = Investment Amount + Sales Charge paid by investor

Formula for calculating:-

* Number of Units received = $\frac{\text{Amount invested}}{\text{Selling Price}}$

** Sales Charge paid by Investor = Sales Charge x Selling Price per Unit x Number of Units received

*** GST of 6% = Sales Charge paid by investor x 6%
