Asset Management

This Product Highlights Sheet only highlights the key features and risks of this Fund. Investors are advised to request, read and understand the Prospectus of the Fund before deciding to invest.

PRODUCT HIGHLIGHTS SHEET
AFFIN HWANG PERWIRA FUND
BRIEF INFORMATION ON THE PRODUCT
1. What is this product about?

The Affin Hwang Perwira Fund is an open-ended mixed asset fund, issued and managed in-house by the Manager.

The Fund seeks to provide investor with a consistent income stream, while achieving long-term capital appreciation.

PRODUCT SUITABILITY
2. Who is this product suitable for?

The Fund is designed for Lembaga Tabung Angkatan Tentera (LTAT) contributors.

KEY PRODUCT FEATURES
3. What am I investing in?

Launch Date	12 December 2019
Tenure	The Fund is an open-ended fund where it does not have a fixed maturity date and may only be terminated in accordance with the terms of the Prospectus and the provisions of the Deed.
Investment Strategy	<p>To meet the Fund's objective, the Fund will hold the flexibility to invest into a range of asset classes depending on the prevailing market conditions. These asset classes would range from:-</p> <ul style="list-style-type: none"> • equities; and • fixed income instruments such as debentures, money market instruments and/or deposits with Financial Institutions. <p>At any one time, the asset mix may also comprise of one or all asset classes. To provide diversification, the investment strategy would be unconstrained by any country, market capitalisation or sector. However, the investment in gaming, liquor and tobacco will be avoided.</p> <p>We will combine the top-down and bottom-up investment approach to identify investment opportunities. In our equities and equity-linked instruments selection process, we seek to identify companies that we believe are attractively valued relative to long-term growth these companies can achieve. These companies will be identified through internal research, and by subjecting them to a disciplined set of growth, valuation and quality criteria. Criteria that are looked at during the investment selection process include sales and profit growth, financial strength and gearing levels, capital expenditure levels, as well as the management's commitment to rewarding shareholders via dividends or capital repayments.</p> <p>When selecting fixed income instruments, the selection will depend largely on the credit quality of the issuers, their ability to meet their financial obligations, display a healthy cash flow, the collateral type, value, claims priority, as well as issuances that offer highest safety for timely payment of interest and capital.</p> <p>The asset allocation decision is decided with the consideration of the market outlook for the respective asset classes over the medium to long-term horizon. Under normal market</p>

Asset Management

	<p>conditions, we will likely hold a higher exposure into the equity market to capitalise on growth potential. However, we may reduce equity exposure for the Fund when the risk reward environment turns less attractive, thus increasing the exposure into the fixed income market instead.</p> <p>To achieve its objective, the Fund may also invest in unlisted securities, collective investment schemes as well as equity-linked instruments such as warrants and rights issues.</p> <p>Due to the fast paced market environment, we will also hold the option to invest in money market instruments and fixed deposits with Financial Institutions while waiting for investment opportunities to arise in equities or fixed income markets. The selection of the issuers will depend largely on the credit quality and liquidity of the issuer based on our internal credit rating model.</p> <p>We typically take an active role when it comes to portfolio trading. We will look to maintain some core holdings that are held over the medium to long-term, which is similar to a buy and hold strategy. A portion of the portfolio will also be kept for trading purposes, which we use to take advantage by participating in investment opportunities that are set to benefit from prevailing market conditions.</p> <p>Foreign Investments</p> <p>To meet its objective, the Fund will also invest into global financial markets. The decision to invest into respective markets will be opportunistically driven, where we would seek out investments that could provide a potential to enhance the returns of the Fund. The Fund will, however, only invest into markets where the regulatory authorities are ordinary or associate members of the IOSCO.</p> <p>Derivative</p> <p>Derivative trades may be carried out for hedging purposes through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Futures and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date. Swaps, whereas, is an agreement to swap or exchange two financial instruments between two parties.</p> <p>The intention of hedging is to protect the value of the asset from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While these hedging transactions would protect the Fund against potential losses, trades for hedging purposes would also limit the returns that the Fund may have potentially received from foreign exchange gains should the Fund not have hedged its foreign currency exposure.</p>						
<p>Asset Allocation</p>	<table border="1"> <thead> <tr> <th data-bbox="379 1570 1123 1603">Asset Class</th> <th data-bbox="1123 1570 1407 1603">% of the Fund's NAV</th> </tr> </thead> <tbody> <tr> <td data-bbox="379 1603 1123 1637">Equities</td> <td data-bbox="1123 1603 1407 1637">0% - 100%</td> </tr> <tr> <td data-bbox="379 1637 1123 1671">Debentures, money markets instruments and/or deposits</td> <td data-bbox="1123 1637 1407 1671">0% - 100%</td> </tr> </tbody> </table>	Asset Class	% of the Fund's NAV	Equities	0% - 100%	Debentures, money markets instruments and/or deposits	0% - 100%
Asset Class	% of the Fund's NAV						
Equities	0% - 100%						
Debentures, money markets instruments and/or deposits	0% - 100%						
<p>Distribution Policy</p>	<p>Subject to the availability of income, the Fund will provide Unit Holders with annual income distribution by way of reinvestment in the form of additional Units.</p>						
<p>Minimum Initial Investment</p>	<p>MYR100</p>						
<p>Minimum additional Investment</p>	<p>MYR50</p>						
<p>Minimum repurchase amount</p>	<p>50 units</p>						

Asset Management

Minimum units held	50 Units

Note: Please refer to the Fund's Prospectus for further details on the Fund.

4. Who am I investing with?

Relevant parties' information:

The Manager	Affin Hwang Asset Management Berhad
Manager's Delegate (Fund Valuation and Accounting Function)	TMF Trustees Malaysia Berhad
The Trustee	TMF Trustees Malaysia Berhad

5. What are the possible outcomes of my investment?

The Fund is a mixed asset fund which holds the flexibility to invest into a range of asset classes depending on the prevailing market conditions. The Fund's investment into equities would to a great extent, be linked to the price movements of the equity markets. If the equities that are investable by the Fund performs well, the Fund's performance may reflect the same. However, should the equities that are investable by the Fund perform poorly, the Fund's performance may also be impacted negatively.

Unlike fixed deposits which generally provide a guarantee on capital invested and carry specific rate of return, the Fund's investments into debentures do not provide a guarantee on capital contributed nor does it guarantee a fixed rate of return.

Please note that the capital and returns of the Fund are not guaranteed.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Market risk** – Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.
- **Fund management risk** – This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Performance risk** – The performance of the Fund depends on the financial instruments that the Fund purchases. If the instruments do not perform within expectation or if there is a default, then, the performance of the Fund will be impacted negatively. The performance of the Fund may also be impacted if the allocation of assets is not properly done. This is where the experience and expertise of the fund managers are important and the risk on the lack of experience and expertise of the fund managers has been highlighted above. On that basis, there is never a guarantee that investing in the Fund will produce the desired investment returns or distribution of income.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Liquidity risk** – Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund. Upon such event and in the best interest of the Unit Holders, the Trustee

Asset Management

may suspend the repurchase of Units requests.

- **Operation risk** – Operational risk is the risk of loss due to the breakdown, deficiencies or weaknesses in the operational support functions resulting in the operations or internal control processes producing an insufficient degree of customer quality or internal control by the Manager. Operational risk is typically associated with human error, system failure, fraud and inadequate or defective procedures and controls.
- **Loan financing risk** – This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.

Specific risks

- **Stock specific risk** – Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
- **Credit and default risk** – Credit risk relates to the creditworthiness of the issuers of the debentures or money market instruments (hereinafter referred to as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk of an issuer of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment.
- **Interest rate risk** – This risk refers to the impact of interest rate changes on the valuation of debentures or money market instruments (hereinafter referred to as "investment"). When interest rates rise, the investment prices generally decline and this may lower the market value of the investment. The reverse may apply when interest rates fall.
- **Equity-linked instrument risk** – The pricing of the equity-linked instruments such as warrants and right issues will depend on the underlying securities that it is linked to, whereby the growth and performance prospect of the underlying securities would consequentially affect the value of the equity-linked instruments. In addition, the value of the investments may decrease exponentially as the investments approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider to liquidate these investments if there are material adverse changes to its value with the aim to mitigate the risk.
- **Collective investment schemes risk** – As the Fund is allowed to invest in collective investment schemes, any adverse effect on the collective investment schemes managed by the Manager will impact the NAV of the Fund. For example, the collective investment schemes may under-perform its benchmarks due to poor market conditions and as a result, the NAV of the Fund will be adversely affected as the performance of the Fund is dependent on the performance of the collective investment schemes.
- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
- **Country risk** – Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.
- **Regulatory risk** – The investments of the Fund would be exposed to changes in the laws and regulations in the countries that the Fund is invested in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund. In an effort to manage and mitigate such risk, the Manager seeks to continuously keep abreast of regulatory developments (for example, by closely monitoring announcements on regulators' website and mainstream media) in that country. The Manager may dispose its investments in that particular country should the regulatory changes adversely impact the Unit Holders' interest or diminish returns to the Fund.

Note: Please refer to the Fund's Prospectus on further details on the general and specific risks.

Asset Management

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

FEES & CHARGES

7. What are the fees and charges involved?

There are fees and charges involved and you are advised to consider them before contributing to the Fund.

What will I be charged by the Manager?

Sales charge	A Sales Charge of up to 5.50% will be imposed on the initial offer price during the initial offer period and thereafter, the NAV per Unit. <i>LTAT may negotiate for a lower Sales Charge.</i>
Repurchase charge	There will be no Repurchase Charge levied on the repurchase of Units for this Fund.
Switching fee	There will be no switching fee levied on any switching transactions.
Transfer fee	Not applicable as transfer facility is not available for the Fund.

What are the key ongoing fees charged to the Fund?

Management fee	The annual management fee is up to 1.50% per annum of the NAV of the Fund.
Trustee fee	The Fund pays an annual trustee fee of up to 0.06% per annum of the NAV of the Fund (excluding foreign custodian fees and charges).

Note: Please refer to the Prospectus for further explanation and illustration on the Fund's fees, charges and expenses.

ALL FEES AND CHARGES PAYABLE BY YOU ARE SUBJECT TO ALL APPLICABLE TAXES AND/OR DUTIES AS MAY BE IMPOSED BY THE GOVERNMENT AND / OR THE RELEVANT AUTHORITIES FROM TIME TO TIME.

VALUATIONS AND EXITING FROM INVESTMENT

8. How often are valuations available?

The Fund will be valued on every Business Day and you may obtain the NAV and NAV per Unit of the Fund from our customer service personnel at our toll free number 1-300-80-1188 between 8.45 a.m. to 5.30 p.m. on a Business Day. Alternatively, you can email us at khidmatpelanggan@affinhwangam.com.

9. How can I exit from this investment and what are the risks and costs involved?

You may submit the repurchase request by completing a transaction form and returning it to us together with a release letter issued by the LTAT between 8.45 a.m. to 3.30 p.m. on a Business Day. Repurchase proceeds will be transferred to your bank account.

You will be paid within ten (10) days from the day the repurchase request is received by us, provided that all documentations are completed and verifiable.
