RISK FACTORS

GENERAL RISKS

Just like any other form of investment, unit trust funds also carry risks. Risk is the uncertainty to which any form of investment may fluctuate in value. One should consider, amongst others, the following when investing in a unit trust fund:

Affected by variable factors and not guaranteed

The performance of a unit trust fund is affected by many variable factors and is not guaranteed. These include overall economic and financial market conditions such as interest rate fluctuation and stability of local currency. While a track record may provide some insight on future performance, it is by no means guaranteed. The prices of Units may go down as well as up. Likewise, distribution may vary from year to year depending on the performance of the unit trust fund.

Issuer risk

The value of each individual securities that a unit trust fund invests in may decline for a number of reasons which is directly related to the issuer, such as but not limited to, the management performance, financial leverage, changing industry conditions and changes in consumer tastes and demand.

Fund management risk

This risk refers to the day-to-day management of the Fund by the Manager which will impact the performance of the Fund. For example, investment decisions undertaken by the Manager as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraudulent, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.

Financing risk

This risk occurs when you take a financing to finance your investment. The inherent risk of investing with financed money includes you being unable to service the financing repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the financing..

Country risk

The prices of securities may also be affected by the political and economic conditions of the country in which the securities are issued.

SPECIFIC RISKS

Equity and equity linked instruments investment risk

The buying and selling of equities and equity linked instruments (the word “equities” hereinafter is referring to the equity and equity linked instruments) carry a number of risks. The most important being the volatility of the capital markets (of those tradable equities), the general insolvency risk associated with the issuers of equities, and/or the performance of the underlying equity that the equity linked instrument is linked to.

The value of the equities depends on its growth and earning potential, sound management, treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve the expected earnings would result in declining investment value which in turn affects the performance of the Fund. This risk can be mitigated by diversifying the Fund’s portfolio. The Manager will employ stringent stock selection criteria which would

effectively filter its stock components to the equities which may provide returns to the Fund in the form of capital gains and income.

Structured product risk

This risk arises from investments into instruments such as equity linked notes (ELNs) structured by a third party. These instruments are linked to the performance of its underlying investments, hence exposing the Fund to the risk of the underlying investments, for example, investments into ELNs which are linked to the performance of an equity(ies), will expose the Fund to equity risk. As such, the prices of the structured product will be dependent on the prices of its underlying, where a drop in the price of the equity that the ELN is linked to will also result in a drop in the price of the ELN. As these structured products (such as ELNs) are structured by a third party, the Fund will also be exposed to counterparty risk and default risk arising from the third party's inability to meet the agreed terms. Failure by the counterparty to meet its obligation may result in the Fund's NAV to be negatively impacted thus eroding investors' potential returns.

Counterparty risk

Counterparty risk concerns the Fund's investment in structured products (such as equity linked notes) and derivatives (the word "Investments" hereinafter is referring to the structured products and derivatives). Counterparty risk is prevalent as the potential returns derived from the Investments are dependent on the ongoing ability and willingness of the issuer i.e. a Financial Institution to fulfil their respective financial commitments to the Fund in a timely manner. Bankruptcy, fraud or regulatory non-compliance arising out of and/or in connection with the issuer may impair the operations and/or the performance of the Fund. However, stringent credit selection process of the issuer of the Investments by the Manager prior to making the investments, and monitoring mechanisms established by the Manager may potentially mitigate this risk. If, in the opinion of the Manager there is material adverse change to an issuer, the Manager may consider unwinding the issuer's Investments to mitigate potential losses that may arise.

Market risk

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.

Specific stock risk

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.

Liquidity risk

Liquidity risk is defined as the ease with which a security can be sold at or near its fair value depending on the volume traded on the market. If the Fund has a large portfolio of stocks issued by smaller companies, the relatively lower level of liquidity of these stocks can adversely affect the value of the Fund. This is because there are generally less ready buyers of such stocks compared with the stocks of larger and more established companies. This risk is managed by taking greater care in stock selection and diversification.

Dividend policy risk

This risk is particular to a fund which has significant dividend yielding stocks in its portfolio. If at any time there is a change in management policy, significant deterioration in the business or fundamentals of the company invested, it may result in a reduction or removal of the said company's dividend policy. This risk however is mitigated by investing mainly in companies with consistent historical record of at least three (3) years paying dividend and companies with healthy cash flows which refers to companies that are able to meet their cash flow needs when carrying out their operational functions without duress.

Index risk

FTSE Bursa Malaysia KLCI comprises the largest 30 companies listed on the Main Board. A component stock may at any time be removed from the basket of FTSE Bursa Malaysia KLCI index if it does not meet eligibility

requirements of the FTSE Bursa Malaysia Ground Rules. AHGF is susceptible to this risk since 99.8% of the Fund's NAV may be invested in FTSE Bursa Malaysia KLCI components. This risk however is mitigated with daily analysis of the portfolio against the FTSE Bursa Malaysia KLCI component stocks to enable a review on the Funds' component stocks. As such, the Manager will be able to mitigate the index risk through its ability to deviate from the replication of the index.

Credit and default risk

Credit risk relates to the creditworthiness of the issuers of the fixed income instruments such as bonds or money market instruments investment (hereinafter referred as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the investment. In the case of rated investments, this may lead to a credit downgrade. Default risk relates to the risk of an issuer of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment. This could adversely affect the value of the Fund.

Interest rate risk

This risk refers to the impact of interest rate changes on the valuation of the fixed income instruments such as bonds or money market instruments (hereinafter referred as "investment"). When interest rates rise, the investment prices generally decline and this may lower the market value of the investment. The reverse may apply when interest rates fall.

Warrants investment risk

The value of the warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the warrants. In addition, the value of the warrants may decrease exponentially as the warrants approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider unwinding these warrants if there are material adverse changes to its value with the aim to mitigate the risk.

Currency risk

As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Country risk

The foreign investment of the Fund may be affected by risks specific to the country which it invests in. Such risks, which include changes in a country's economic fundamentals, social and political stability, currency movements and foreign investment policies, may have an impact on the prices of the Fund's investment in that country. Consequently, it may also affect the Fund's NAV.

RISK MANAGEMENT

In our day-to-day running of the business, we employ a proactive risk management approach to manage portfolio risks and operational risks. The Board of Directors of AHAM ("the Board") has established a board compliance & risk management committee to oversee AHAM's risk management activities both at operational level and at portfolio management level to ensure that the risk management process is in place and functioning. The board compliance & risk management committee comprises of at least three Board members and is chaired by an independent director. At the operational level, we have established a compliance & risk oversight committee with the primary function of identifying, evaluating and monitoring risks as well as to formulate internal control measures to manage and mitigate the exposure to risks that may affect the performance of the Fund, returns to

the investors or Unit Holders' interest within a clearly defined framework and is primarily responsible for ensuring that the policies and procedures that have been implemented are reviewed on an on-going basis with periodic assessments. The compliance & risk oversight committee reports to the board compliance & risk management committee on a quarterly basis.

In managing portfolio risks, we engage a stringent screening process by conducting fundamental analysis of economic, political and social factors to evaluate their likely effects on the performance of the markets and sectors. Regular meetings are held to discuss investment themes and portfolio decisions taken at the meetings are then implemented according to the investment guidelines which also take into account requirements for minimum portfolio diversification across individual investment holdings, sectors, geographies and asset classes (based on the respective portfolio's objective and strategy). We also practise prudent liquidity management with the objective to ensure that the Fund is able to meet its short-term expenses including repurchase requests by the Unit Holders.

We have in place a system that is able to monitor the transactions to ensure compliance with the Fund's investment limits and restrictions. These limits are system-controlled and not manually tracked, thus reducing the probability of human error occurring in ensuring the Fund's limits and restrictions are adhered to. We also undertake stringent evaluation of movements in market prices and regularly monitor, review and report to the investment committee to ensure that the Fund's investment objective is met. Regular portfolio reviews by senior members of the investment team further reduce the risk of implementation inconsistencies and violations of the Guidelines. We also have in place a credit risk management process to reduce counterparty risk of derivatives and structured products whereby such risk arises when the counterparty is not able to meet their contractual obligations. Prior to entering into a contract with the counterparty, we will conduct an evaluation on the credit standing of the counterparty to ensure they are able to meet their contractual obligations. It is important to note that an event of downgrade does not constitute a default. If we view that the counterparty may have high credit risk, we will not hesitate to take pre-emptive measures to unwind these positions.

We also employ a performance attribution system that enables us to review the performance of the Fund to determine the key factors that have contributed and detracted from the Fund's performance. This system complements our overall risk management process as the system also provides standard risk analytics on the portfolio such as the Fund's standard deviation, tracking error and measures of excess return. The data produced by the performance attribution system is reviewed regularly and at least on a monthly basis in meetings chaired by the managing director and participated by the portfolio managers and the performance evaluation team.

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

To generate capital growth over the medium to long term period through diversified investments of equities listed on Bursa Malaysia.

Any material change to the Fund's investment objective would require Unit Holders' approval.

INVESTORS' PROFILE

This Fund is suitable for you if you:-

- have a medium to long term investment horizon;
- seek potentially higher returns relative to benchmark and are tolerant to market volatility.

BENCHMARK

FTSE Bursa Malaysia KLCI

The risk profile of this Fund is different from the risk profile of the benchmark.

Information on the benchmark can be obtained from <http://www.bursamalaysia.com>.

The FTSE Bursa Malaysia KLCI has been selected as the Fund remains focused on providing investors with access into investment opportunities through a portfolio of companies listed on Bursa Malaysia. As such, the benchmark will be a reflection of the Fund's strategy.

ASSET ALLOCATION

Equities and equity linked instruments	70% to 99.8%
Fixed income instruments	Maximum 30%

The Manager will maintain a sufficient level of cash for liquidity purposes

INVESTMENT STRATEGY

To provide investors the opportunity to participate in the Malaysian equity market, the Fund will be invested in a portfolio of listed companies with growth potential over the medium to long term period. The Fund is structured as an open-ended fund with equities and equity linked instruments investments as its focus. A minimum allocation of 70% of the Fund's NAV invested into companies listed on Bursa Malaysia. The balance of the Fund's NAV may be invested in fixed Income instruments which include money market instruments and fixed deposits while waiting for opportunities in the equity market. Investments made into fixed income instruments will be primarily made during adverse market conditions to reduce the risk of the Fund. The selection of these fixed income instruments will be dependent on an internal credit selection process. The process will focus on issuers' ability to meet their financial obligations, and offer highest safety for timely payment of interest and principal.

To achieve the investment objective, the Manager's investment approach is to invest in equities with a focus on companies that exhibit strong growth potential. These companies are gauged through their competitive advantage against their sector and/or industry peers. In determining the competitive position, the Manager will look at the company's market share cost leadership, product differentiation and product benefits. To this end, the Fund will actively seek out opportunities to provide investors with capital growth. As part of its strategy, the Fund may also invest into dividend yielding stocks. However, to mitigate adverse impact from companies revising their dividend payout policy, we will focus on companies that already hold a stable dividend policy such as, for example, a consistent historical dividend payout over the past three (3) years and have healthy cash flows which refers to companies that are able to meet their cash flow needs when carrying out their operational functions without duress.

The Manager may invest in collective investment schemes that hold similar investment objectives to the Fund's investment objective.

To meet its objective, the Fund will also look at investing into equity linked instruments such as rights and warrants, as well as unlisted securities such as unlisted bonds, and Initial Public Offerings (IPOs). The Fund may invest up to 20% of its NAV in countries where the regulatory authorities are the ordinary or associate members of the International Organisation of Securities Commission (IOSCO).

Principal Investment Strategies

The Manager combines top-down and bottom-up approach in conducting the stock selection process. The top-down approach begins with a review of the Malaysian economy and its financial markets from a global economic perspective. Stock selection will then be carried out after an analysis on the outlook for the broader domestic economy as well as sector outlook. In identifying individual companies, the Manager applies top-down approach by conducting fundamental assessment which will include, amongst others, historical and expected dividend yield, return on equity, earnings per share growth rate, financial strength, and management quality/track records.

The Fund may also invest in structured products, such as equity-linked notes (ELN). As the ELN's are structured by a third party, investments into these instruments will result in the Fund being exposed to credit and default risk. Similarly, as the price of ELNs are generally linked to an underlying equity / basket of equities, the investments into these structured products will also expose the Fund to similar risks as investing into a direct equity i.e. equity risks. As a result, any fluctuation in the price of the structured product may also lead to fluctuations in the NAV of the Fund i.e., if the price of the structured product sees a drop in price, the NAV of the Fund will also be negatively impacted.

Usage of Derivatives

Derivative trades may be carried out for hedging purposes, through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Future and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date. Swaps, whereas, is an agreement to swap or exchange two financial instruments between two parties.

The intention of hedging is to protect the value of the asset from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While these hedging transactions would protect the Fund against potential losses, trades for hedging purposes would also limit the returns that the Fund may have potentially received from foreign exchange gains would the Fund not have hedged its foreign currency exposure.

Temporary Defensive Measures

The Manager may take temporary defensive positions that may be inconsistent with the Fund's principal strategy by raising cash levels or increasing the Fund's asset allocation weighting in fixed income instruments, in attempting to respond to adverse conditions that may impact the financial markets.

Policy on Active and Frequent Trading of Securities

For the Fund's trading policy, the Manager will maintain a core holding for the Fund, which it intends to hold over a medium to long-term investment horizon bias, which is similar to a buy and hold philosophy. At the same time, the Manager may also take advantage of prevailing market conditions to trade securities when opportunity arises to assist the Fund in meeting its objective.

Where no market value is publicly available or where the use of the quoted market value is inappropriate, or where no market price is available, including in the event of suspension in the quotation of the securities for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee, such listed securities will be valued at fair value determined in good faith by us, based on the methods or bases approved by the Trustee after appropriate technical consultation.

Unlisted securities

For unlisted securities, valuations will be based on fair value as determined in good faith by us using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

Fixed deposits

Fixed deposits placed with Financial Institutions will be by reference to the principal value of such investments and the profits accrued thereon for the relevant period.

Debentures

Valuation of unlisted debentures denominated in Ringgit Malaysia will be done using the fair value price quoted by a bond pricing agency (“BPA”) registered with the SC. If we are of the view that the price quoted by BPA differs from the “market price” by more than 20 basis points, we and our delegate may use the “market price”, provided that we or our delegate records its basis for using a non-BPA price, obtains the necessary internal approvals to use the non-BPA price and keeps an audit trail of all decisions and basis for adopting the “market yields”. Investments in other unlisted debentures will be valued using the fair value by reference to the average indicative price quoted by at least 3 independent and reputable institutions. In the case of listed debentures, the last traded prices quoted on an exchange will be used. However, where (a) valuation based on the market price does not represent the fair value of the securities, for example during abnormal market conditions and (b) no market price is available, including in the event of a suspension in the quotation of the securities for a period exceeding 14 days, or such shorter period as agreed by the trustee, then the securities should be valued at fair value, as determined in good faith by us or our delegate, based on the methods or bases approved by the Trustee after appropriate technical consultation.

Money market instruments

For money market instruments, the valuation may use the amortization method, i.e. the purchased discount or premium will be amortized to the remaining period of maturity.

Derivatives and structured products

The valuation of derivatives and structured products will be based on the rates provided by the respective issuers. For foreign exchange forward contracts ("FX Forwards"), the Manager will apply interpolation formula to compute the value of the FX Forwards based on the rates provided by the Bloomberg. If the rates are not available on the Bloomberg, the FX Forwards will be valued by reference to the average indicative rate quoted by at least 3 independent dealers. In the case where the Manager is unable to obtain quotation from 3 independent dealers, the FX Forwards will be valued in accordance with fair value as determined in good faith by the Manager, on methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

Unlisted collective investment schemes

Unlisted collective investment schemes will be valued based on the last published repurchase price.

VALUATION POINT FOR THE FUND

The Fund will be valued at 6.00 p.m. on every Business Day (or "trading day" or "T" day). However, if the Fund has exposure to investments outside of Malaysia, the Fund shall be valued at 11.00 a.m. on the next Business Day (or "T + 1").

All foreign assets are translated into the base currency based on the latest available exchange rate quoted by Bloomberg/Reuters at 4.00 p.m. (United Kingdom time) which is equivalent to 11 p.m. or 12 a.m. midnight (Malaysian time) on the same day, or at such time as stipulated in the investment management standards issued by the FiMM. If the foreign market in which the Fund is invested in is closed for business, we will value the underlying assets based on the latest available price as at the day the particular foreign market was last opened for business.

POLICY ON GEARING AND MINIMUM LIQUID ASSETS REQUIREMENTS

The Fund is not permitted to borrow cash or other assets (including the borrowing of securities within the meaning of the Securities Borrowing and Lending Guidelines [SBL Guidelines]) in connection with its activities. However, the Fund may borrow cash for the purpose of meeting repurchase requests for Units and such borrowings are subjected to the following:-

- the Fund borrowing is only on a temporary basis and that borrowings are not persistent;
- the borrowing period should not exceed one (1) month;
- the aggregate borrowings of the Fund should not exceed 10% of the Fund's NAV at the time the borrowing is incurred; and
- the Fund may only borrow from financial institutions.

Except for securities lending as provided under the SBL Guidelines, none of the cash or investments of the Fund may be lent. Further, the Fund may not assume, guarantee, endorse or otherwise become directly or contingently liable for or in connection with any obligation or indebtedness of any person.

In structuring the investment portfolio of the Fund, we will maintain sufficient liquid assets to ensure short-term liquidity in the Fund to meet operating expenses and possible repurchase of Units.

ANNUAL MANAGEMENT FEE

The annual management fee is up to 1.50% per annum of the NAV of the Fund. This fee is calculated and accrued daily and payable monthly to the Manager.

Please note that the example below is for illustration only:

Assuming that the total NAV (before deducting the management fee and the trustee fee) in a Fund is MYR 120 million. The calculation of annual management fee based on the total NAV of the Fund is:

$$\frac{\text{MYR } 120,000,000 \times 1.50\%}{365 \text{ days}} = \text{MYR } 4,931.50 \text{ per day}$$

TRUSTEE FEE

The annual trustee fee is up to 0.08% per annum of the NAV of the Fund, subject to a minimum of MYR 18,000 per annum (excluding foreign custodian fees and charges). In addition to the trustee fee which includes the transaction fee i.e. the fee incurred for handling purchase/sale of local investments, the Trustee may be reimbursed by the Fund for any expenses properly incurred by it in the performance of its duties and responsibilities.

The trustee fee is calculated and accrued daily and payable monthly to the Trustee.

Please note that the example below is for illustration only:

Assuming that the NAV of the Fund is MYR 120 million for that day, the accrued trustee fee for that day would be:

$$\frac{\text{MYR } 120,000,000 \times 0.08\%}{365 \text{ days}} = \text{MYR } 263.01 \text{ per day}$$

ADMINISTRATIVE FEES

PRICING

COMPUTATION OF NAV AND NAV PER UNIT

The NAV of the Fund is determined by deducting the value of all the Fund's liabilities from the value of all the Fund's assets, at a particular valuation point. The NAV per Unit is the NAV of the Fund divided by the number of Units in Circulation, at the same valuation point.

Please refer to the "Valuation Point Of The Fund" section of this Prospectus for an explanation of the valuation point.

Illustration on computation of NAV and NAV per Unit for a particular day:-

Units in Circulation	300,000,000.00
	MYR
Investments	195,000,000.00
Add other assets	5,700,000.00
Gross asset value	200,700,000.00
Less: Liabilities	700,000.00
NAV (before deduction of management fee and trustee fee for the day)	200,000,000.00
Less: Management fee for the day	8,219.18
Less: Trustee fee for the day	383.56
NAV (before GST)	199,991,397.26
Less: GST of 6% on the management fee for the day	493.15
Less: GST of 6% on the trustee fee for the day	23.01
NAV (after GST)	199,990,881.10
NAV per Unit*	0.6666

For the purpose of the illustration above, the computation of NAV and NAV per Unit are based on the assumption that the expenses are inclusive of GST.

* NAV per Unit is derived from the following formula:-

$$\frac{\text{NAV (after GST)}}{\text{Units in Circulation}}$$

The rounding policy is four (4) decimal points for the purposes of publication of the NAV per Unit. However, the rounding policy will not apply when calculating the Sales Charge and Repurchase Charge (where applicable).

INCORRECT PRICING

We will take immediate action to rectify any incorrect valuation and/or pricing of the Fund and/or the Units and to notify the Trustee and the SC of the same unless the Trustee considers the incorrect valuation and/or pricing of the Fund and/or the Units is of minimal significance.

The Trustee will not consider an incorrect valuation and/or pricing of the Fund and/or the Units to be of minimal significance if the error involves a discrepancy of 0.5% or more of the NAV per Unit unless the total impact on your account is less than MYR 10.00 or its foreign currency equivalent, if applicable. An incorrect valuation and/or pricing not considered to be of minimal significance by the Trustee will result in reimbursement of moneys in the following manner:

	Reimbursement by:	Receiving parties:
Over valuation and/or pricing in relation to the purchase and creation of Units.	Fund	Unit Holder
Over valuation and/or pricing in relation to the repurchase of Units.	AHAM	Fund
Under valuation and/or pricing in relation to the purchase and creation of Units	AHAM	Fund
Under valuation and/or pricing in relation to the repurchase of Units	Fund	Unit Holder or former Unit Holder

COMPUTATION OF SELLING PRICE AND REPURCHASE PRICE

The Selling Price and the Repurchase Price are equivalent to the NAV per Unit. Any applicable Sales Charge and Repurchase Charge are payable separately from the Selling Price and Repurchase Price.

Forward Pricing will be used to determine the Selling Price per Unit and the Repurchase Price per Unit of the Fund, which are the NAV per Unit for the Fund as at the next valuation point after we receive the purchase request or repurchase request.

The Selling Price for Units of Fund created under the EMIS will be based on the NAV per Unit at the end of the Business Day on which the purchase request or repurchase request is received by us.

Calculation of Selling Price

Units will be sold at the NAV per Unit of the Fund. Any Sales Charge payable by the Unit Holder would be calculated as a percentage of the NAV per Unit of the Fund.

For illustration purposes, let's assume the following:-

Investment Amount	MYR 10,000.00
Selling Price per Unit	MYR 0.50
Number Of Units Received*	MYR 10,000 ÷ MYR 0.50 = 20,000 Units
Sales Charge	5.50%
Sales Charge Paid By Investor**	5.50% x MYR 0.50 x 20,000 Units = MYR 550
GST of 6%***	MYR 550 x 6% = MYR 33
Total Amount Paid By Investor****	MYR 10,000 + MYR 550 + MYR 33 = MYR 10,583

Formula for calculating:-

* Number of Units received	=	$\frac{\text{Amount invested}}{\text{Selling Price}}$
** Sales Charge paid by investor	=	Sales Charge x Selling Price per Unit x Number of Units received
*** GST of 6%	=	Sales Charge paid by investor x 6%
**** Total amount paid by investor	=	Amount invested + Sales Charge paid by investor + GST

Calculation of Repurchase Price

The Repurchase Price is the NAV per Unit of the Fund. Any Repurchase Charge payable by the Unit Holder would be calculated as a percentage of the Repurchase Price of the Fund.

For illustration purposes, let's assume the following:-

Units Repurchased	20,000 Units
Repurchase Price	MYR 0.50
Repurchased Amount [^]	20,000 Units x MYR 0.50 = MYR 10,000
Repurchase Charge	0.00%
Repurchase Charge Paid By Investor ^{^^}	0.00% x MYR 10,000 = MYR 0.00
GST of 6% ^{^^^}	RM 0.00 x 6% = MYR 0.00
Total Amount Received By investor ^{^^^^}	MYR 10,000 + MYR 0.00 + MYR 0.00 = MYR 10,000

Formula for calculating:-

[^] Repurchase amount	=	Unit repurchased x Repurchase Price
^{^^} Repurchase Charge paid by investor	=	Repurchase Charge x Repurchase amount
^{^^^} GST of 6%	=	Repurchase Charge paid by investor x 6%
^{^^^^} Total amount received by investor	=	Repurchased amount + Repurchase Charge paid by investor + GST

TAXATION OF THE TRUST OFFERED UNDER AFFIN HWANG GROWTH FUND AND UNITHOLDERS

Dear Sirs,

This letter has been prepared for inclusion in the Prospectus ("hereinafter referred to as "the Prospectus") in connection with the offer of units in Affin Hwang Growth Fund ("the Trust").

The taxation of income for both the Trust and the unitholders are subject to the provisions of the Malaysian Income Tax Act, 1967 ("the Act"). The applicable provisions are contained in Section 61 of the Act, which deals specifically with the taxation of trust bodies in Malaysia.

TAXATION OF THE TRUST

The Trust will be regarded as resident for Malaysian tax purposes since the Trustee of the Trust is resident in Malaysia.

1. Domestic Investments

i. General Taxation

The income of the Trust consisting of dividends, interest or profit¹ (other than interest / profit¹ which is exempt from tax) and other investment income derived from or accruing in Malaysia, after deducting tax allowable expenses, is liable to Malaysian income tax at the rate of 24 per cent.

Gains on disposal of investments by the Trust will not be subject to income tax.

ii. Dividend and Other Exempt Income

Effective 1 January 2014, all companies have adopted the single-tier system. Hence, dividends received would be exempted from tax and the deductibility of expenses incurred against such dividend income would be disregarded. There will no longer be any tax refunds available for single-tier dividends received. Dividends received from companies under the single-tier system would be exempted.

The Trust may receive Malaysian dividends which are tax exempt. The exempt dividends may be received from investments in companies which had previously enjoyed or are currently enjoying the various tax incentives provided under the law. The Trust will not be taxable on such exempt income.

Interest or profit¹ or discount income derived from the following investments are exempt from tax:

- (a) Securities or bonds issued or guaranteed by the Government of Malaysia;
- (b) Debentures or sukuk, other than convertible loan stocks, approved or authorized by, or lodged with, the Securities Commission Malaysia; and
- (c) Bon Simpanan Malaysia issued by Bank Negara Malaysia.

As such, provided the investment in structured products is seen to be “debentures” under Capital Markets and Services Act 2007, the income received will be exempted. Otherwise, tax implications could arise.

Interest income or profit¹ derived from the following investments are exempt from tax tax:

- (a) Interest or profit¹ paid or credited by any bank or financial institution licensed under the Financial Services Act 2013 or Islamic Financial Services Act 2013;
- (b) Interest income paid or credited by any development financial institution regulated under the Development Financial Institutions Act 2002;
- (c) Bonds, other than convertible loan stocks, paid or credited by any company listed in Bursa Malaysia Securities Berhad ACE Market; and
- (d) Interest or profit¹ paid or credited by Malaysia Building Society Berhad².

The interest income / profit¹ or discount exempted from tax at the Trust’s level will also be exempted from tax upon distribution to the unitholders.

2. Foreign Investments

Income of the Trust in respect of overseas investment is exempt from Malaysian tax by virtue of Paragraph 28 of Schedule 6 of the Act and distributions from such income will be tax exempt in the hands of the unitholders. Such income from foreign investments may be subject to foreign taxes or withholding taxes in the specific foreign country. However, any foreign tax suffered on the income in respect of overseas investment is not tax refundable to the Trust in Malaysia.

The foreign income exempted from Malaysian tax at the Trust level will also be exempted from tax upon distribution to the unitholders.

3. Tax Allowable Expenses

Expenses wholly and exclusively incurred in the production of gross income are allowable as deductions under Section 33(1) of the Act. In addition, Section 63B of the Act provides for tax deduction in respect of managers’ remuneration, expenses on maintenance of the register of Unitholders, share registration expenses, secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postages. The deduction is based on a formula subject to a minimum of 10 per cent and a maximum of 25 per cent of the expenses. The above expenses will include the relevant irrecoverable Goods and Services Tax (“GST”) incurred by the Trust.

4. Other Income

The Trust may be receiving income such as exit fee which will be subject to tax at the rate of 24 percent.

5. Hedging Instruments

The tax treatment of hedging instruments would depend on the particular hedging instruments entered into.

Generally, any gain / loss relating to the principal portion will be treated as capital gain / loss. Gains / losses relating to the income portion would normally be treated as revenue gains / losses. The gain / loss on revaluation will only be taxed or claimed upon realisation. Any gain / loss on foreign exchange is treated as capital gain / loss if it arises from the revaluation of the principal portion of the investment.

6. Real Property Gains Tax (“RPGT”)

With effect from 1 January 2014, any gains on disposal of real properties or shares in real property companies³ (chargeable asset) by the Trust would be subject to RPGT at the following rates:-

Disposal time frame	RPGT rates
Within 3 years	30%
In the 4 th year	20%
In the 5 th year	15%
In the 6 th year and subsequent years	5%

7. Goods and Services Tax (“GST”)

GST has been implemented effective 1 April 2015 at the rate of 6% to replace the existing sales tax and service tax. Based on the guidelines⁴ issued, the Trust, being collective investment vehicles, will be making exempt supplies. Hence, the Trust is not required to register for GST purposes. However, the Trust will incur expenses such as management fees, trustee fees and other administrative charges which will be subject to 6% GST. The 6% input tax incurred on such expenses will not be claimable by the Trust.

TAXATION OF UNITHOLDERS

Unitholders will be taxed on an amount equivalent to their share of the total taxable income of the Trust to the extent of the distributions received from the Trust. The income distribution from the Trust will carry a tax credit in respect of the Malaysian tax paid by the Trust. Unitholders will be entitled to utilise the tax credit against the tax payable on the income distribution received by them. No additional withholding tax will be imposed on the income distribution from the Trust.

Corporate unitholders, residents and non-resident, will generally be liable to income tax at 24 per cent on distribution of income received from the Trust. The tax credits attributable to the distribution of income can be utilised against the tax liabilities of these Unitholders.

Individuals and other non-corporate Unitholders who are tax resident in Malaysia will be subject to income tax at graduated rates ranging from 1 per cent to 28⁶per cent. Individuals and other non-corporate Unitholders who are not resident in Malaysia will be subject to income tax at 28⁷ per cent. The tax credits attributable to the distribution of income can be utilised against the tax liabilities of these Unitholders.

Non-resident Unitholders may also be subject to tax in their respective jurisdictions and depending on the provisions of the relevant country’s tax legislation and any double tax treaty with Malaysia, the Malaysian tax suffered may be creditable in the foreign tax jurisdictions.

The distribution of exempt income and gains arising from the disposal of investments by the Trust will be exempted from tax in the hands of the Unitholders.

Any gains realised by Unitholders (other than those in the business of dealing in securities, insurance companies or financial institutions) on the sale or redemption of the units are treated as capital gains and will not be subject to income tax. This tax treatment will include in the form of cash or residual distribution in the event of the winding up of the Trust.

Unitholders electing to receive their income distribution by way of investment in the form of new units will be regarded as having purchased the new units out of their income distribution after tax.

Unit splits issued by the Trust are not taxable in the hands of unitholders.

The issuance of units by the Trust is an exempt supply. The selling or redemption of the units is also an exempt supply and therefore is not subject to GST. Any fee based charges related to buying of the units by Unitholders in Malaysia and outside Malaysia such as sales or service charge or switching fees will be subject to GST at a standard rate of 6%.

We hereby confirm that the statements made in this report correctly reflect our understanding of the tax position under current Malaysian tax legislation. Our comments above are general in nature and cover taxation in the context of Malaysian tax legislation only and do not cover foreign tax legislation. The comments do not represent specific tax advice to any investors and we recommend that investors obtain independent advice on the tax issues associated with their investments in the Trust.

Yours faithfully,
for and on behalf of
