RISK FACTORS

This section of the Prospectus provides you with information on the general risks involved when investing in the Fund and the specific risks associated with the securities/instruments that the Fund will be investing in.

GENERAL RISKS

➤ **Market risk**

Market risk arises because of factors that affect the entire market place. Factors such as economic growth, political stability and social environment are some examples of conditions that have an impact on businesses, whether positive or negative. It stems from the fact that there are economy-wide perils, or instances of political or social instability which threaten all businesses. Hence, the Fund will be exposed to market uncertainties and fluctuations in the economic, political and social environment that will affect the market price of the investments either in a positive or negative way.

➤ **Fund management risk**

This risk refers to the day-to-day management of the Fund by us which will impact the performance of the Fund. For example, investment decisions undertaken by us as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.

➤ **Performance risk**

The performance of the Fund depends on the financial instruments that the Fund purchases. If the instruments do not perform within expectation or if there is a default, then, the performance of the Fund will be impacted negatively. The performance of the Fund may also be impacted if the allocation of assets is not properly done. This is where the experience and expertise of the fund managers are important and the risk on the lack of experience and expertise of the fund managers has been highlighted above. On that basis, there is never a guarantee that investing in the Fund will produce the desired investment returns or distribution of income.

➤ **Inflation risk**

This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.

➤ **Liquidity risk**

Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund. Upon such event and in the best interest of the Unit Holders, the Trustee may suspend the repurchase of Units requests. Please refer to "*Suspension of Dealing in Units*" section of this Prospectus for more details.

➤ **Operational risk**

Operational risk is the risk of loss due to the breakdown, deficiencies or weaknesses in the operational support functions resulting in the operations or internal control processes producing an insufficient degree of customer quality or internal control by the Manager. Operational risk is typically associated with human error, system failure, fraud and inadequate or defective procedures and controls.

➤ **Loan financing risk**

This risk occurs when you take a loan or financing to finance your investment. The inherent risk of investing with borrowed money includes you being unable to service the loan repayments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the loan.

SPECIFIC RISKS

➤ **Stock specific risk**

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.

➤ **Credit and default risk**

Credit risk relates to the creditworthiness of the issuers of the debentures or money market instruments (hereinafter referred to as "investment") and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the investment. In the case of rated investment, this may lead to a credit downgrade. Default risk relates to the risk of an issuer of the investment either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the investment.

➤ **Interest rate risk**

This risk refers to the impact of interest rate changes on the valuation of debentures or money market instruments (hereinafter referred to as "investment"). When interest rates rise, the investment prices generally decline and this may lower the market value of the investment. The reverse may apply when interest rates fall.

➤ **Equity-linked instruments risk**

The pricing of the equity-linked instruments such as warrants and right issues will depend on the underlying securities that it is linked to, whereby the growth and performance prospect of the underlying securities would consequentially affect the value of the equity-linked instruments. In addition, the value of the investments may decrease exponentially as the investments approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider to liquidate these investments if there are material adverse changes to its value with the aim to mitigate the risk.

➤ **Collective investment schemes risk**

As the Fund is allowed to invest in collective investment schemes, any adverse effect on the collective investment schemes managed by the Manager will impact the NAV of the Fund. For example, the collective investment schemes may under-perform its benchmarks due to poor market conditions and as a result, the NAV of the Fund will be adversely affected as the performance of the Fund is dependent on the performance of the collective investment schemes.

➤ **Currency risk**

As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

➤ **Country risk**

Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.

➤ **Regulatory risk**

The investments of the Fund would be exposed to changes in the laws and regulations in the countries that the Fund is invested in. These regulatory changes pose a risk to the Fund as it may materially impact the investments of the Fund. In an effort to manage and mitigate such risk, the Manager seeks to continuously keep abreast of regulatory developments (for example, by closely monitoring announcements on regulators' website and mainstream media) in that country. The Manager may dispose its investments in that particular country should the regulatory changes adversely impact the Unit Holders' interest or diminish returns to the Fund.

In our day-to-day running of the business, we employ a proactive risk management approach to manage portfolio risks and operational risks. The Board has established a board compliance & risk management committee to oversee AHAM's risk management activities both at operational level and at portfolio management level to ensure that the risk management process is in place and functioning. The board compliance & risk management committee comprises of at least three Board members and is chaired by an independent director. At the operational level, we have established a compliance & risk oversight committee with the primary function of identifying, evaluating and monitoring risks as well as to formulate internal control measures to manage and mitigate the exposure to risks that may affect the performance of the Fund, returns to the investors or Unit Holders' interest within a clearly defined framework and is primarily responsible for ensuring that the policies and procedures that have been implemented are reviewed on an on-going basis with periodic assessments. The compliance & risk oversight committee reports to the board compliance & risk management committee on a quarterly basis.

In managing portfolio risks, we engage a stringent screening process by conducting fundamental analysis of economic, political and social factors to evaluate their likely effects on the performance of the markets and sectors. Regular meetings are held to discuss investment themes and portfolio decisions taken at the meetings are then implemented according to the investment guidelines which also take into account requirements for minimum portfolio diversification across individual investment holdings, sectors, geographies and asset classes (based on the portfolio's objective and strategy). For investments in fixed income securities, credit risks are evaluated at a credit committee. We also practice prudent liquidity management with the objective to ensure that the Fund is able to meet its short-term expenses including repurchase requests by the Unit Holders.

We have in place a system that is able to monitor the transactions to ensure compliance with the Fund's investment limits and restrictions. These limits are system-controlled and not manually tracked, thus reducing the probability of human error occurring in ensuring the Fund's investment limits and restrictions are adhered to. We also undertake stringent evaluation of movements in market prices and regularly monitor, review and report to the investment committee to ensure that the Fund's investment objective is met. Regular portfolio reviews by senior members of the investment team further reduce the risk of implementation inconsistencies and violations of the Guidelines. We also have in place a credit risk management process to reduce counterparty risk of derivatives whereby such risk arises when the counterparty is not able to meet their contractual obligations. Prior to entering into a contract with the counterparty, we will conduct an evaluation on the credit standing of the counterparty to ensure they are able to meet their contractual obligations. It is important to note that an event of downgrade does not constitute a default. If we view that the downgrade in the rating of the counterparty may lead to high credit risk, we will not hesitate to take pre-emptive measures to unwind these positions.

We also employ a performance attribution system that enables us to review the performance of the Fund to determine the key factors that have contributed to and detracted from the Fund's performance. This system complements our overall risk management process as the system also provides standard risk analytics on the portfolio such as the Fund's standard deviation, tracking error and measures of excess return. The data produced by the performance attribution system is reviewed regularly and at least on a monthly basis in meetings chaired by the managing director and participated by the portfolio managers and the performance evaluation team.

! It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

ASSET ALLOCATION

Equities	0% - 100%
Debentures, money markets instruments and/or deposits	0% - 100%

INVESTMENT STRATEGY

To meet the Fund's objective, the Fund will hold the flexibility to invest into a range of asset classes depending on the prevailing market conditions. These asset classes would range from:-

- equities; and
- fixed income instruments such as debentures, money market instruments and/or deposits with Financial Institutions.

At any one time, the asset mix may also comprise of one or all asset classes. To provide diversification, the investment strategy would be unconstrained by any country, market capitalisation or sector. However, the investment in gaming, liquor and tobacco will be avoided.

We will combine the top-down and bottom-up investment approach to identify investment opportunities. In our equities and equity-linked instruments selection process, we seek to identify companies that we believe are attractively valued relative to long-term growth these companies can achieve. These companies will be identified through internal research, and by subjecting them to a disciplined set of growth, valuation and quality criteria. Criteria that are looked at during the investment selection process include sales and profit growth, financial strength and gearing levels, capital expenditure levels, as well as the management's commitment to rewarding shareholders via dividends or capital repayments.

When selecting fixed income instruments, the selection will depend largely on the credit quality of the issuers, their ability to meet their financial obligations, display a healthy cash flow, the collateral type, value, claims priority, as well as issuances that offer highest safety for timely payment of interest and capital.

The asset allocation decision is decided with the consideration of the market outlook for the respective asset classes over the medium to long-term horizon. Under normal market conditions, we will likely hold a higher exposure into the equity market to capitalise on growth potential. However, we may reduce equity exposure for the Fund when the risk reward environment turns less attractive, thus increasing the exposure into the fixed income market instead.

To achieve its objective, the Fund may also invest in unlisted securities, collective investment schemes as well as equity-linked instruments such as warrants and rights issues.

Due to the fast paced market environment, we will also hold the option to invest in money market instruments and fixed deposits with Financial Institutions while waiting for investment opportunities to arise in equities or fixed income markets. The selection of the issuers will depend largely on the credit quality and liquidity of the issuer based on our internal credit rating model.

We typically take an active role when it comes to portfolio trading. We will look to maintain some core holdings that are held over the medium to long-term, which is similar to a buy and hold strategy. A portion of the portfolio will also be kept for trading purposes, which we use to take advantage by participating in investment opportunities that are set to benefit from prevailing market conditions.

Foreign Investments

To meet its objective, the Fund will also invest into global financial markets. The decision to invest into respective markets will be opportunistically driven, where we would seek out investments that could provide a potential to enhance the returns of the Fund. The Fund will, however, only invest into markets where the regulatory authorities are ordinary or associate members of the IOSCO.

Derivative

Derivative trades may be carried out for hedging purposes through financial instruments including, but not limited to, forward contracts, futures contracts and swaps. Futures and forward contracts are generally contracts between two parties to trade an asset at an agreed price on a pre-determined future date. Swaps, whereas, is an agreement to swap or exchange two financial instruments between two parties.

The intention of hedging is to protect the value of the asset from any adverse price movements. For example, to hedge against foreign currency exchange risk, the Fund may enter into a currency forward contract to offset any adverse foreign currency movements by determining an agreed rate for an agreed tenure with its counterparty. While these hedging transactions would protect the Fund against potential losses, trades for hedging purposes would also limit the returns that the Fund may have potentially received from foreign exchange gains should the Fund not have hedged its foreign currency exposure.

VALUATION OF THE FUND

We will ensure that the valuation of the Fund is carried out in a fair manner in accordance to the relevant laws and Guidelines. We will obtain the daily price or value of the assets for the purpose of valuing the Fund in accordance to the Malaysian Financial Reporting Standard 9 issued by the Malaysian Accounting Standards Board. In the absence of daily price or value of the assets, we will use the latest available price or value of the assets respectively. The valuation bases for the permitted investments of the Fund are as below:

➤ **Listed securities**

Valuation of listed securities such as equities, warrants or listed collective investment schemes shall be based on the market price i.e closing bid price. Where no market value is publicly available or where the use of the quoted market value is inappropriate, or where no market price is available, including in the event of suspension in the quotation of the securities for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee, such securities will be valued at fair value determined in good faith by the Manager, based on the methods or bases approved by the Trustee after appropriate technical consultation.

➤ **Unlisted securities**

For unlisted securities, valuations will be based on fair value as determined in good faith by the Manager using methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

➤ **Debentures**

For unlisted MYR denominated debentures, valuation will be done using the fair value price quoted by a bond pricing agency (“BPA”) registered with the SC. If the Manager is of the view that the price quoted by BPA differs from the “market price” quoted by at least 3 independent dealers by more than 20 basis points and the Manager determines that the methodology used by the independent dealers to obtain the “market price” is more appropriate, the Manager may elect to use the price quoted by the independent dealers as the “market price”, provided that the Manager records its basis for using a non-BPA price, obtains the necessary internal approvals to use the non-BPA price and keeps an audit trail of all decisions and basis for adopting the “market yields”. Investments in other unlisted debentures will be valued using the average indicative price quoted by at least 3 independent dealers. For listed debentures, the valuations will be done in the same manner as “Listed Securities” described above.

➤ **Deposit**

Deposits placed with Financial Institutions are valued by reference to the principal value of such investments and the interests accrued thereon for the relevant period.

➤ **Money market instruments**

The valuation of MYR denominated money market instruments will be done using the price quoted by a BPA registered with the SC. For foreign money market instruments, valuation will be done using the average indicative yield quoted by 3 independent and reputable institutions.

➤ **Collective investment schemes**

Unlisted collective investment schemes will be valued based on the last published repurchase price. Listed collective investment schemes will be valued in the same manner as “Listed Securities” described above.

➤ **Derivatives**

The valuation of derivatives will be based on the rates provided by the issuers. For foreign exchange forward contracts ("FX Forwards"), the Manager will apply interpolation formula to compute the value of the FX Forwards based on the rates provided by Bloomberg. If the rates are not available on Bloomberg, the FX Forwards will be valued by reference to the average indicative rate quoted by at least 3 independent dealers. In the case where the Manager is unable to obtain quotation from 3 independent dealers, the FX Forwards will be valued in accordance to fair value as determined in good faith by the Manager, on methods or bases which have been verified by the auditor of the Fund and approved by the Trustee.

VALUATION POINT FOR THE FUND

The Fund will be valued at 6.00 p.m on every Business Day (or "trading day" or "T" day). However, if the Fund has exposure to investments outside of Malaysia, the Fund shall be valued at 11.00 a.m. on the next Business Day (or "T + 1"). All foreign assets are translated into the Base Currency based on the last available bid exchange rate quoted by Bloomberg/Reuters at 4.00 p.m. (United Kingdom time) which is equivalent to 11.00 p.m. or 12.00 midnight (Malaysian time) on the same day, or at such time as stipulated in the investment management standards issued by the FiMM.

POLICY ON GEARING AND MINIMUM LIQUID ASSETS REQUIREMENTS

The Fund is not permitted to seek financing (including those within the meaning of the SC's Securities Borrowing and Lending Guidelines [SBL Guidelines]) in connection with its activities. However, the Fund may seek cash financing for the purpose of meeting repurchase requests for Units and for short-term bridging requirements. Such financings are subjected to the following:-

- the Fund's cash financing is only on a temporary basis and that financings are not persistent;
- the financing period should not exceed one (1) month;
- the aggregate financings of the Fund should not exceed 10% of the Fund's NAV at the time the financing is incurred; and
- the Fund may only obtain financing from Financial Institutions; and

Except for securities lending as provided under the SBL Guidelines, none of the cash or investments of the Fund may be lent. Furthermore, the Fund may not assume, guarantee, endorse or otherwise become directly or contingently liable for or in connection with any obligation or indebtedness of any person.

In structuring the portfolio of the Fund, we will maintain sufficient liquid assets to ensure short-term liquidity in the Fund to meet operating expenses and possible repurchase of Units.

SALES CHARGE

The following are the fees that you may **indirectly** incur when you invest in the Fund.

ANNUAL MANAGEMENT FEE

The annual management fee is up to 1.50% per annum of the NAV of the Fund. This fee is calculated and accrued daily and payable monthly to the Manager.

Please note that the example below is for illustration only:

Assuming that the NAV of the Fund is MYR 200 million for that day, the accrued management fee for that day would be:

$$\frac{\text{MYR } 200,000,000 \times 1.50\%}{365 \text{ days}} = \text{MYR } 8,219.18 \text{ per day}$$

ANNUAL TRUSTEE FEE

The Fund pays an annual trustee fee of up to 0.06% per annum of the NAV of the Fund (excluding foreign custodian fees and charges). In addition to the annual trustee fee, which includes the transaction fee, i.e. the fee incurred for handling purchase/sale of local investments, the Trustee may be reimbursed by the Fund for any expenses properly incurred by it in the performance of its duties and responsibilities.

The trustee fee is calculated and accrued daily and payable monthly to the Trustee.

Please note that the example below is for illustration only:

Assuming that the NAV of the Fund is MYR 200 million for that day, the accrued trustee fee for that day would be:

$$\frac{\text{MYR } 200,000,000 \times 0.06\%}{365 \text{ days}} = \text{MYR } 328.76 \text{ per day}$$

PRICING

COMPUTATION OF NAV AND NAV PER UNIT

The NAV of the Fund is determined by deducting the value of all the Fund's liabilities from the value of all the Fund's assets, at a particular valuation point. The NAV per Unit is the NAV of the Fund divided by the number of Units in Circulation, at the same valuation point.

Please refer to the "Valuation Point For The Fund" section of this Prospectus for an explanation of the valuation point.

Illustration on computation of NAV and NAV per Unit for a particular day:-

Units in Circulation	300,000,000.00
	MYR
Investments	195,000,000.00
Add other assets	5,700,000.00
Gross asset value	200,700,000.00
Less: Liabilities	700,000.00
NAV (before deduction of management fee and trustee fee for the day)	200,000,000.00
Less: Management fee for the day	8,219.18
Less: Trustee fee for the day	328.76
NAV	199,991,452.06
NAV per Unit*	0.6666

* NAV per Unit is derived from the following formula:-

$$\frac{\text{NAV}}{\text{Units in Circulation}}$$

The rounding policy is four (4) decimal points for the purposes of publication of the NAV per Unit. However, the rounding policy will not apply when calculating the Sales Charge and Repurchase Charge (where applicable).

INCORRECT PRICING

We will take immediate action to rectify any incorrect valuation and/or pricing of the Fund and/or the Units and to notify the Trustee and the SC of the same unless the Trustee considers the incorrect valuation and/or pricing of the Fund and/or the Units is of minimal significance.

The Trustee will not consider an incorrect valuation and/or pricing of the Fund and/or the Units to be of minimal significance if the error involves a discrepancy of 0.5% or more of the NAV per Unit unless the total impact on your account is less than MYR 10.00. An incorrect valuation and/or pricing not considered to be of minimal significance by the Trustee will result in reimbursement of moneys in the following manner:

	Reimbursement by:	Receiving parties:
Over valuation and/or pricing in relation to the purchase and creation of Units.	Fund	Unit Holder
Over valuation and/or pricing in relation to the repurchase of Units.	AHAM	Fund
Under valuation and/or pricing in relation to the purchase and creation of Units	AHAM	Fund
Under valuation and/or pricing in relation to the repurchase of Units	Fund	Unit Holder or former Unit Holder

COMPUTATION OF SELLING PRICE AND REPURCHASE PRICE

Under a single pricing regime, the Selling Price and the Repurchase Price are equivalent to the NAV per Unit. Any applicable Sales Charge and Repurchase Charge is payable separately from the Selling Price and Repurchase Price.

During initial offer period, the Selling Price and/or the Repurchase Price is equivalent to the initial offer price. Forward Pricing will be used to determine the Selling Price and the Repurchase Price after the initial offer period, i.e. the NAV per Unit as at the next valuation point after we receive the purchase request or repurchase request.

Calculation of Selling Price

For illustration purposes, let's assume the following:

Investment Amount	MYR 10,000.00
Selling Price per Unit	MYR 0.50
Number Of Units Received*	MYR 10,000 ÷ MYR 0.50 = 20,000 Units
Sales Charge	5.50%
Sales Charge Paid By Investor**	5.50% x MYR 0.50 x 20,000 Units = MYR 550
Total Amount Paid By Investor***	MYR 10,000 + MYR 550 = MYR 10,550

Formula for calculating:-

- * Number of Units received = $\frac{\text{Investment amount}}{\text{Selling Price}}$
- ** Sales Charge paid by investor = Sales Charge x Selling Price per Unit x Number of Units received
- *** Total amount paid by investor = Investment amount + Sales Charge paid by investor

Calculation of Repurchase Price

For illustration purposes, let's assume the following:-

Units Repurchased	20,000 Units
Repurchase Price	MYR 0.50
Repurchased Amount^	20,000 Units x MYR 0.50 = MYR 10,000
Repurchase Charge	0.00% of the NAV per Unit
Repurchase Charge Paid By Investor^^	0.00% x MYR 10,000 = MYR 0.00
Total Amount Received By Investor^^^	MYR 10,000 - MYR 0.00 = MYR 10,000

Formula for calculating:-

- ^ Repurchase amount = Unit repurchased x Repurchase Price
- ^^ Repurchase Charge paid by investor = Repurchase Charge x Repurchase amount
- ^^^ Total amount received by investor = Repurchased amount - Repurchase Charge paid by investor

TAX ADVISERS' LETTER

17 June 2019

The Board of Directors
Affin Hwang Asset Management Berhad
Ground Floor, Menara Boustead
69, Jalan Raja Chulan
50200 Kuala Lumpur
Dear Sirs

Affin Hwang Perwira Fund **Taxation of the Fund and Unit Holders**

1. This letter has been prepared for inclusion in the Prospectus (hereinafter referred to as "the Prospectus") in connection with the offer of units in the Affin Hwang Perwira Fund (hereinafter referred to as "the Fund").

The following is general information based on Malaysian tax law in force at the time of lodging the Prospectus with the Securities Commission Malaysia ("SC") and investors should be aware that the tax law may be changed at any time. To an extent, the application of tax law depends upon an investor's individual circumstances. The information provided below does not constitute tax advice. The Manager therefore recommends that an investor consult his accountant or tax adviser on questions about his individual tax position.

2. Taxation of the Fund

2.1 Income Tax

As the Fund's Trustee is resident in Malaysia, the Fund is regarded as resident in Malaysia. The taxation of the Fund is governed principally by Sections 61 and 63B of the Malaysian Income Tax Act, 1967 ("MITA").

Pursuant to the Section 2(7) of MITA, any reference to interest shall apply, mutatis mutandis, to gains or profits received and expenses incurred, in lieu of interest, in transactions conducted in accordance with the principles of Shariah. The effect of this is that any gains or profits received and expenses incurred, in lieu of interest, in transactions conducted in accordance with the principles of Shariah, will be accorded the same tax treatment as if they were interest.

The income of the Fund in respect of dividends, interest or profits from deposits and other investment income (other than income which is exempt from tax) derived from or accruing in Malaysia is liable to income tax. The Fund may be receiving income such as exit fee which will be subject to tax at the prevailing tax rate applicable on the Fund. Gains on disposal of investments by the Fund will not be subject to income tax.

The income tax rate applicable to the Fund is 24%.

Tax exempt interest as listed in the Appendix attached received by the Fund are not subject to income tax.

With effect from 1 January 2014, Malaysia has fully moved to a single-tier income tax system. The Fund is not liable to tax on any Malaysia sourced dividends paid, credited or distributed to the Fund under the single tier tax system, where the company paying such dividend is not entitled to deduct tax under the MITA. The tax deductibility of other deductions by the Fund against such dividend income will be disregarded in ascertaining the chargeable income of the Fund.

In addition to the single-tier dividend that may be received by the Fund, the Fund may also receive Malaysian dividends which are tax exempt from investments in companies which had previously enjoyed or are currently enjoying the various tax incentives provided under the law. The Fund is not subject to income tax on such tax exempt dividend income.

The Fund may also receive dividends, profits and other income from investments outside Malaysia. Income derived from sources outside Malaysia and received in Malaysia by a unit trust is exempted from Malaysian income tax. However, such income may be subject to foreign tax in the country from which the income is derived.

The tax treatment of hedging instruments would depend on the particular hedging instruments entered into. Generally, any gain or loss relating to the principal portion will be treated as capital gain or loss. Gains or losses relating to the income portion would normally be treated as revenue gains or losses. The gain or loss on revaluation will only be taxed or claimed upon realisation. Any gain or loss on foreign exchange is treated as capital gain or loss if it arises from the revaluation of the principal portion of the investment.

Generally, income from distribution by the Malaysia Real Estate Investment Trusts (“REIT”) will be received net of withholding tax of 10%. No further tax will be payable by the Fund on the distribution. Distribution from such income by the Fund will also not be subject to further tax in the hands of the Unit Holders.

Expenses being manager’s remuneration, maintenance of register of Unit Holders, share registration expenses, secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postage, which are not allowed under the general deduction rules, qualify for a special deduction, subject to a minimum of 10% and a maximum of 25% of such expenses pursuant to Section 63B of the MITA.

2.2 Gains on Disposal of Investments

Gains on disposal of investments by the Fund will not be subject to income tax but where the investments represent shares in real property companies, such gains may be subject to Real Property Gains Tax (“RPGT”) under the RPGT Act, 1976. A real property company is a controlled company which owns or acquires real properties or shares in real property companies with a market value of not less than 75% of its total tangible assets. A controlled company is a company which does not have more than 50 members and is controlled by not more than 5 persons.

2.3 Goods and Services Tax (“GST”) and Service Tax

GST was repealed effective from 1 September 2018 and Service Tax was introduced as a replacement tax effective from 1 September 2018.

As the Fund is not providing a taxable service under the Service Tax Regulations 2018, it is not required to register for Service Tax or charge Service Tax. Should the Fund provide taxable services (i.e. management and consulting services) with an aggregate value of RM500,000 or more in a 12 months period, the Fund would be required to register for Service Tax and charge Service Tax on the said services at the prevailing rate of 6%. The issuance of units by the Fund to investors will not be subject to Service Tax, and no Service Tax would be included in the price of the units. Any distributions made by the Fund to unitholders are also not subject to Service Tax.

Any fund management fees that are charged to the Fund by the Fund Managers in relation managing the Fund would not be subject to Service Tax as fund management fees are excluded from the scope of Service Tax under the Service Tax Regulations 2018. To the extent that the Fund invests in any financial services products (e.g. securities, derivatives, units in a fund or unit trust), the acquisition of these interests will also not be subject to Service Tax.

3. Taxation of Unit Holders

3.1 Taxable Distribution

Unit Holders will be taxed on an amount equivalent to their share of the total taxable income of the Fund to the extent such income is distributed to them. Unit Holders are also liable to pay income tax on the taxable income distributions paid by the Fund. Taxable income distributions carry a tax credit in

respect of the tax chargeable on that part of the Fund. Unit Holders will be subject to tax on an amount equal to the net taxable income distribution plus attributable underlying tax paid by the Fund.

Income distributed to Unit Holders is generally taxable as follows in Malaysia :-

Unit Holders	Malaysian Tax Rates for Year of Assessment 2018	Malaysian Tax Rates for Year of Assessment 2019

Non-resident Unit Holders may also be subject to tax in their respective jurisdictions and depending on the provisions of the relevant tax legislation and any double tax treaties with Malaysia, the Malaysian tax suffered may be creditable in the foreign tax jurisdictions.

3.2 Tax Exempt Distribution

Tax exempt distributions made out of gains from realisation of investments and other exempt income earned by the Fund will not be subject to Malaysian tax in the hands of Unit Holders, whether individual or corporate, resident or non-resident. All Unit Holders do not pay tax on that portion of their income distribution from the Fund's distribution equalisation account.

Any gains realised by a Unit Holder on the sale, transfer or redemption of his units are generally tax-free capital gains unless the Unit Holder is an insurance company, a financial institution or a person trading or dealing in securities. Generally, the gains realised by these categories of Unit Holders constitute business income on which tax is chargeable.
