5. What are the possible outcomes of my investment?

This is an equity fund that invests into Shariah-compliant equities within Asia (ex Japan) markets. The Fund's exposure into foreign equities will be focused within the Asia (ex Japan) markets. The performance of the Fund

* At our discretion, we may reduce the transaction value and Units, including for transactions made via digital channels, subject to the terms and conditions disclosed in the respective channels.

would be dependent on the Asia (ex Japan) equity markets that are investable by the Fund. The Fund's performance is also reliant on the Manager's expertise in managing the Fund to meet its objective.

The Fund's investment into Shariah-compliant equities would to a great extent, to be linked to the price movements of the global equity markets, and the underlying assets of the collective investment schemes. If the equities that are investable by the Fund performs well, the Fund's performance may reflect the same. However, should the local and foreign equities that are investable by the Fund perform poorly, the Fund's performance may also be impacted negatively.

Unlike fixed deposits which generally provide a guarantee on capital invested and a fixed rate of return, the Fund's does not provide a guarantee on capital contributed nor does it guarantee a fixed rate of return.

The Fund is expected to distribute income on an annual basis, subject to income availability.

KEY RISKS

6. What are the key risks associated with this product?

General risks

- **Fund management risk** - This risk refers to our day-to-day management of the Fund which will impact the performance of the Fund. For example, our investment decisions as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the Deed, relevant law or guidelines due to factors such as human error, fraud, dishonesty or weaknesses in operational process and systems, may adversely affect the performance of the Fund.
- **Inflation risk** – This is the risk that your investment in the Fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
- **Financing risk** – This risk occurs when you take a financing to finance your investment. The inherent risk of investing with financed money includes you being unable to service the financing payments. In the event Units are used as collateral, you may be required to top-up your existing instalment if the prices of Units fall below a certain level due to market conditions. Failing which, the Units may be sold at a lower NAV per Unit as compared to the NAV per Unit at the point of purchase towards settling the financing.
- **Operational risk** – This risk refers to the possibility of a breakdown in our internal controls and policies. The breakdown may be a result of human error, system failure or fraud where our employees collude with one another. This risk may cause monetary loss and/or inconvenience to you. We will regularly review our internal policies and system capability to mitigate this risk. Additionally, we maintain a strict segregation of duties to mitigate instances of fraudulent practices amongst our employees.
- **Liquidity risk** - Liquidity risk refers to two scenarios. The first is where an investment cannot be sold due to unavailability of a buyer for that investment. The second scenario exists where the investment, by its nature, is thinly traded. This will have the effect of causing the investment to be sold below its fair value which would adversely affect the NAV of the Fund and subsequently the value of Unit Holders' investments in the Fund.
- **Suspension of Repurchase Request Risk** - Having considered the best interests of Unit Holders, the repurchase requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time. Hence, their investments will continue to be subject to the risks inherent to the Fund.

Specific risks

- **Shariah-compliant equity investment risk** – The buying and selling of Shariah-compliant equities carry a number of risks, the most important being the volatility of the capital markets on which those securities are traded and the general insolvency risk associated with the issuers of Shariah-compliant equities.
The value of the Shariah-compliant equities depends on its growth and earning potential, sound management, treatment of minority shareholders, as well as a myriad of other factors. Failure to achieve the expected earnings would result in declining investment value which in turn affects the performance of the Fund. This risk can be mitigated by diversifying the Fund's portfolio. The Manager will employ stringent stock selection criteria which would effectively filter its stock components to Shariah-compliant equities which can provide returns to the Fund in the form of capital gains and income.
- **Currency risk** – As the investments of the Fund may be denominated in currencies other than the Base Currency, any fluctuation in the exchange rate between the Base Currency and the currencies in which the investments are denominated may have an impact on the value of these investments. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Currency risk at the Fund level

The impact of the exchange rate movement between the Base Currency and the currency of the underlying investments may result in a depreciation of the value of the investments as expressed in the Base Currency.

Currency risk at the Class Level

The impact of the exchange rate movement between the Base Currency and the currency of the respective Class (other than RM Class) may result in a depreciation of your holdings as expressed in the Base Currency.

- **Shariah-compliant warrants investment risk** – The value of the Shariah-compliant warrants will depend on the pricing of the underlying security whereby the growth and performance prospect of the underlying security would consequentially affect the value of the Shariah-compliant warrants. In addition, the value of the Shariah-compliant warrants may decrease exponentially as the Shariah-compliant warrants approach its maturity date and the potential gains from a favourable price movement of the underlying may be offset by aggressive time decay. We may consider unwinding these Shariah-compliant warrants if there are material adverse changes to its value with the aim to mitigate the risk.
- **Country risk** – Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of Units to fall.
- **Derivative risk** – Valuation of Islamic derivatives takes into account a multitude of factors such as movement of the underlying asset, volatility of underlying assets, the correlation of the underlying assets with the Fund, the implied future direction of the underlying assets and other factors. Any adverse changes of the factors mentioned above may result in a lower NAV price.
- **Reclassification of Shariah-status risk** – This risk refers to the risk that the currently held Shariah-compliant equities in the Fund may be reclassified to be Shariah non-compliant in the periodic review of the equities by the SAC of the SC, the Shariah Adviser or the Shariah boards of the relevant Islamic indices. If this occurs, we will take the necessary steps to dispose of such equities. There may be opportunity loss to the Fund due to the Fund not being allowed to retain the excess capital gains derived from the disposal of the Shariah non-compliant equities. We will be required to dispose of these equities immediately if the prices are above the purchase price. Should the prices be below the purchase price, we may choose to hold on to these holdings until the prices meet the purchase price. Nevertheless, should we decide to dispose of these equities below the purchase price, the Fund will be faced with the risk of realising its losses, thus negatively impacting the NAV of the Fund. Please refer to “Shariah Investment Guidelines” of this Prospectus on the Fund’s Shariah methodology on the treatment of gains and losses as a result of the reclassification of Shariah non-compliant equities.

Note: Please refer to the Fund’s Prospectus on further detail of each risk.

It is important to note that events affecting the investments cannot always be foreseen. Therefore, it is not possible to protect investments against all risks. You are recommended to read the whole Prospectus to assess the risks associated with the Fund. If necessary, you should consult your professional adviser(s) for a better understanding of the risks.

Since commencement, the Fund has registered a return of 28.52% compared to the benchmark return of 30.40%, underperforming by 1.88%.

Basis of calculation and assumption made in calculating the returns:-

The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distribution payable (if any) during the stipulated period.

An illustration of the above would be as follow:-

Capital return = NAV per Unit end / NAV per Unit begin – 1
 Income return = Income distribution per Unit / NAV per Unit ex-date
 Total return = (1+Capital return) x (1+Income return) - 1

Income Distribution

FYE	2022	2021	2020
Gross distribution per Unit (sen)	1.80	2.00	2.50
Net distribution per Unit (sen)	1.80	2.00	2.50

Distribution will be made in the form of cash as well as Units in lieu of cash, if any.

Portfolio Turnover Ratio (PTR)

FYE	2022	2021	2020
PTR (times)	1.91	1.87	1.62

The PTR of the Fund was higher than previous year due to higher average sum of total acquisition and disposal for the financial year.

PAST PERFORMANCE OF THE FUND IS NOT AN INDICATION OF ITS FUTURE PERFORMANCE.
